

Parking on footpaths
and across driveways
is unsafe & illegal

Cars parked on footpaths, nature strips or near intersections can create serious **SAFETY HAZARDS**.

Reduced visibility - Vehicles parked on footpaths/nature strips make it difficult for other users to clearly see and anticipate other road users' intentions.

Pedestrians in danger when forced onto the road - It is dangerous for pedestrians, especially children, if forced to walk on the road. Some pedestrians need the assistance of mobility devices which also require a little extra room.

Emergency services such as fire & ambulance are impeded - Vehicles blocking or restricting access can delay critical services from being delivered to businesses or residents.

It can seriously interfere with access or damage underground infrastructure and services - Fire hydrants, telecommunications, electricity and gas services may be underground and heavy and constant vehicle movements could cause serious damage to these services. Footpaths/nature strips are not designed for traffic and continual use can further damage paths causing hazards.

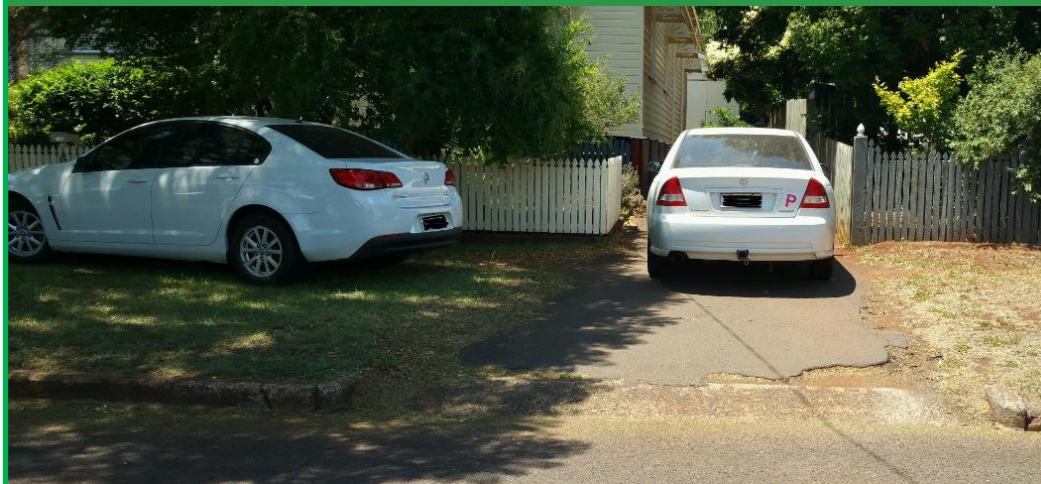

Please be considerate of residents in this area and park lawfully.

Vehicles found to be non-compliant with parking laws risk being infringed.

Transport Operations (Road Use Management – Road Rules)
Regulation 2009 Part 12, Section 197 & 198
