Information for Students and Parents choosing Year 10 Areas of Study

The implementation of the Australian Curriculum began in Queensland in 2012.

Religious Education, English, Mathematics, Science, History and Health and Physical Education comprise the six compulsory areas of study for students in Years 7 to 10.

Therefore, our students will complete compulsory semester units and have the opportunity to select elective units. Students entering Year 10 in 2022 will nominate 4 semester units they wish to study during the next year. Additionally, they are required to select two back-up units to study if all original preferences cannot be met.

It is a matter for the College to determine when particular units will be studied as the student's allocation depends on staffing and resources.

Detailed information on the Australian Curriculum can be accessed on the ACARA website: www.acara.edu.au. It is encouraged that you make yourself as familiar as possible with the latest education reforms and what they mean for your children.

This handbook has been produced to help students plan a Course of Study which will provide a balanced education across Key Learning Areas and provide greater opportunity for success.

The Curriculum consists of a set of semester units from which students can choose according to their own needs and abilities.

Contained in this handbook are details of the subject unit offerings planned for Year 10, 2022. An elective's viability to be included will also depend on the availability of staff, resources and student interest.

Choosing a Study Pathway

The Australian Curriculum Review

The implementation of Australian Curriculum began in Queensland in 2012. In 2021, the Australian Curriculum Assessment and Reporting Authority (ACARA) announced that the curriculum would undergo a review by the end of the year. The aim of the review is to improve the Australian Curriculum from Foundation to Year 10 by refining, realigning and reducing the existing content of the curriculum.

As a result of this ACARA Curriculum Review, Curriculum areas taught at St Joseph's College will undergo changes ready for implementation in 2022. Therefore, the information in this handbook will be updated to reflect those changes. At the time of publication, information in this handbook was accurate, however it may be subject to changes.

Core & Extension Subjects

There are six compulsory core areas of study at St Joseph's College:

- Religion,
- English,
- Mathematics,
- Science,
- Humanities,
- Physical Education.

At St Joseph's College, as Year 10 students embark on the post-compulsory phase of senior schooling, our Year 10 students are encouraged to select a pathway that best reflects their interests and aspirations for Years 11 and 12.

In Year 10, with the Core group of subjects, students may select subjects that will best prepare them for potential courses of study in Years 11 and 12.

Students have the option of selecting Year 10 CORE subjects that align with a:

- General Pathway (QCE, ATAR)
- Applied Pathway (QCE, SBA, SBT or TAFE)
- Combination of both

NB: For students who elect to study Extension Subjects (English, Mathematics) it is recommended that students have completed these subjects to a B standard in Year 9.

| General Pathway (ATAR, QCE) | Applied Pathway (QCE, SBT, SBA, TAFE) |
|------------------------------|---------------------------------------|
| Religion | Religion |
| Extension English or English | English or Short Course in Literacy |
| Extension Maths or Maths | Maths or Short Course Numeracy |
| General Science | Applied Science |
| Humanities | Humanities |
| Physical Education | Physical Education |
| +4 Semester Electives | +4 Semester Electives |

The core program will help prepare students for transition into Year 10 and maximise options for their Senior Phase of Learning.

Elective Subjects

Elective subjects in the Middle Years comprise a variety of ACARA curriculum areas.

This handbook has been produced to help students plan a Course of Study which will provide a balanced education across Key Learning Areas and provide greater opportunity for success.

The St Joseph's College Curriculum consists of a set of semester units from which students can choose according to their own needs and abilities.

Some elective subjects may incur a levy and additional costs for excursions and camps.

Year 10 Elective Subjects & Course Codes

| Subject | Semester 1 | Semester 2 |
|--------------------------------|------------------|------------------|
| Business and Economics | 10BUA1 10BUE1 | 10BLS2 10BUE2 |
| Design Technology | 10DES1 | 10DES2 |
| Design Technologies - Wood | 10DTW1 | 10DTW2 |
| Design Technologies - Metal | 10DTM1 | 10DTM2 |
| Design Technologies - Textiles | 10DTT1 | 10DTT2 |
| Design Technologies - Food | 10DTF1 | 10DTF2 |
| Digital Technology | 10DIG1 | 10DIG2 |
| Japanese | 10JAP1 | 10JAP2 |
| French | 10FRE1 | 10FRE2 |
| The Arts - Drama | 10DRA1 | 10DRA2 |
| The Arts - Music | 10MUS1 | 10MUS2 |
| The Arts - Visual Art | 10VAR1 | 10VAR2 |

Elective Structure

| Elective Structure at St Joseph's College | | | | |
|---|---|----------------------------|--|----------------------------|
| | Term 1 | Term 2 | Term 3 | Term 4 |
| Year 7 | Compulsory Rotations 1 & 2 | Compulsory Rotations 3 & 4 | Compulsory Rotations 5 & 6 | Compulsory Rotations 7 & 8 |

| Year 10 | Core | | Core | |
| | Elective 9 & 10 (Skills Development) | | Elective 11 & 12 (Skills Development) | |

Skills Development

Students at St Joseph's College are allocated a Skills Development line based on assessment of individual need and with parental permission. In Years 7 and 8 the Skills line replaces a Language, whereas in later years it takes the place of an Elective. These lessons focus on students developing the fundamental skills required for successfully navigating secondary school such as organisation, learning of routines, study skills, pre and post learning of subject content, homework and assessment support and other assistance as required. The Skills teacher develops positive learning relationships with students and liaises with classroom teachers and parents so that student support is relevant, and skills are transferrable to the classroom and home environments.

Strategies for choosing Subjects

As a basic strategy it is suggested that students choose subjects:

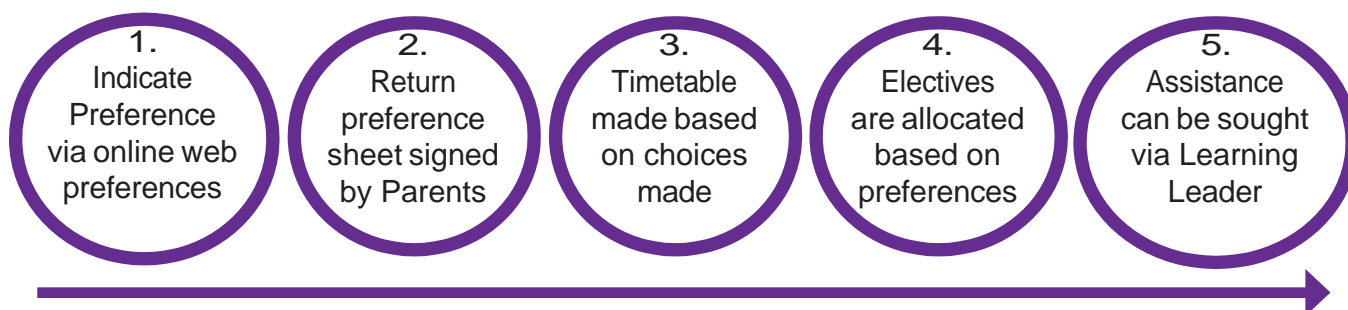

- they enjoy
- in which they have already had some success
- which may help them reach a chosen career
- prerequisites for Senior Subjects
- which develops skills, knowledge and attitudes useful throughout their life

It is important to remember that students are individuals and that their needs and requirements in subject selection will be quite different from those of other students.

This means that it is unwise to either take or avoid a subject because:

- someone told them they will like or dislike it
- their friends are or are not taking it
- they like or dislike the teacher
- 'only boys or girls take that subject' – all subjects have equal value for males and females.

Year 10 Subject Selection Process

Teaching & Learning Framework

The St Joseph's College Teaching and Learning Framework

As an aspirational learning community, St Joseph's College embraces a culture of learning to empower young people to pursue their passions and meet the demands of their future pathways.

The St Joseph's College Teaching and Learning Framework is designed to guide the work of all teachers and learners as we seek to aspire to excellence for all students at the College. The framework clarifies beliefs about successful learners and effective learning in an aspirational community. The framework informs consistent practice with a common language based on evidence and research.

Religious Education

Compulsory Core Subject

In Year 10, students learn about various ways in which humans have an understanding of the mystery of God or the 'Other', which is ultimately beyond human language, concepts and stories. These include the human experience of the created world: the valuable insights of the major world religions (Christianity, Islam, Judaism, Hinduism and Buddhism) as reflected in their core beliefs and practices the different representation of God in the Old Testament and New Testament texts by various human authors in different historical, social and cultural context; Christian spiritual writing that search for the mystery of God in the midst of world events and the course of human history; and participation in person and communal prayer that can lead believers to the contemplation (the simple awareness of the presence of God).

Students explore how the Church has responded to the range of unprecedented threats to both human ecology and environment ecology facing Australia and the Modern World (c. 1918 to the present) from science, technology, materialism, consumerism and political ideologies. They develop critical understanding of the various sources that guide the Church's action in the world today, including the teaching of Jesus and the early Church, the principles of Catholic social teaching and the reasoned judgments of conscience, carefully formed and examined. They examine the Eucharist as the primary and indispensable source of nourishment for the spiritual life of believers, who carry on Jesus' mission in the world. They continue to develop their understanding of prayer in the Christian tradition through and exploration of Centering Prayer: prayers for justice, peace and the environment, including the Prayer of St Francis, the Magnificat and Canticle of Creation; and mediative prayer practices, include praying with the help of nature.

Term 1: Journeys of Faith

Students explore the fertile question: How can we travel in the footsteps of St Paul?

- they use evidence from New Testament texts to explain different representations of God by various human authors in different historical, social and cultural contexts and evaluate their application for a modern context.
- They critically analyse the writings of St Paul to search for the mystery of God in the midst of world events and the course of human history. They explain the significance of various sources that guide the Church's action in the world (including the teaching of Jesus and the early Church through the Letters of St Paul) and that nourish the spiritual life of believers.

Term 2: Ecotheology

Students explore the fertile question: How should we as a Catholic community respond to environmental issues?

- Students explain how the mystery of God can be named and understood through the experience of the created world.
- Students analyse ways in which the Church has responded to a range of emerging threats to both human ecology and environmental ecology.

Term 3: Throw Open the Window

Students explore the fertile question: Are the windows still open?

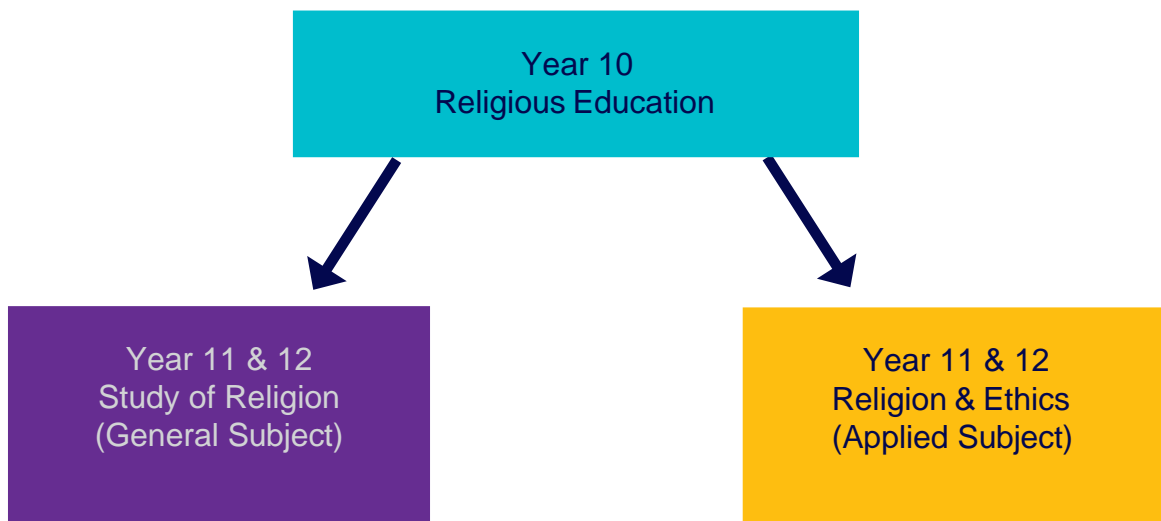

- Students explain the significance of various sources that guide the Church's action in the world (including Vatican II documents and the Australian Plenary Council) and that nourish the spiritual life of believers (including the Eucharist; and individual and communal prayer for justice, peace and the environment).
- They develop and justify their own response to a contemporary moral question connected to the agenda for the Australian Plenary Council, using evidence from these various sources to support their response.

Term 4: The Mystery

Students explore the fertile question: Why all the mystery?

- Students identify different ways in which humans have understanding of the mystery of God or the 'Other'.
- Explain how the mystery of God can be named and understood through the experiences of the created world.
- Analyse core beliefs and practices of the major world religions and Aboriginal spiritualities and explain how these reflect the human understanding of God or the 'Other'.
- Investigate how different representations of God in Old Testament texts reflect the different historical, social and cultural contexts of their human authors and explore their relevance for a modern Australian context.
- Critically analyse a range of Christian spiritual writings that reflect the search for the mystery of God in the midst of world events.
- Participate respectfully in vocal and meditative prayer that can lead believers to contemplation.

Religious Education Pathways

Compulsory Core Subject

English

The English curriculum is built around the three interrelated strands of language, literature and literacy. Teaching and learning programs should balance and integrate all three strands. Together, the strands focus on developing students' knowledge, understanding and skills in listening, reading, viewing, speaking, writing and creating. Learning in English builds on concepts, skills and processes developed in earlier years, and teachers will revisit and strengthen these as needed.

In Years 9 and 10, students interact with peers, teachers, individuals, groups and community members in a range of face-to-face and online/virtual environments. They experience learning in familiar and unfamiliar contexts, including local community, vocational and global contexts.

Students engage with a variety of texts for enjoyment. They interpret, create, evaluate, discuss and perform a wide range of literary texts in which the primary purpose is aesthetic, as well as texts designed to inform and persuade. These include various types of media texts, including newspapers, film and digital texts, fiction, non-fiction, poetry, dramatic performances and multimodal texts, with themes and issues involving levels of abstraction, higher order reasoning and intertextual references. Students develop critical understanding of the contemporary media and the differences between media texts.

The range of literary texts for Foundation to Year 10 comprises Australian literature, including the oral narrative traditions of Aboriginal and Torres Strait Islander Peoples, as well as the contemporary literature of these two cultural groups, and classic and contemporary world literature, including texts from and about Asia.

Literary texts that support and extend students in Year 10 as independent readers are drawn from a range of genres and involve complex, challenging and unpredictable plot sequences and hybrid structures that may serve multiple purposes. These texts explore themes of human experience and cultural significance, interpersonal relationships, and ethical and global dilemmas within real-world and fictional settings and represent a variety of perspectives. Informative texts represent a synthesis of technical and abstract information (from credible/verifiable sources) about a wide range of specialised topics. Text structures are more complex and include chapters, headings and subheadings, tables of contents, indexes and glossaries. Language features include successive complex sentences with embedded clauses, a high proportion of unfamiliar and technical vocabulary, figurative and rhetorical language, and dense information supported by various types of graphics and images.

Students create a range of imaginative, informative and persuasive types of texts including narratives, procedures, performances, reports, discussions, literary analyses, transformations of texts and reviews.

Unit 1: Ethical Issues (Term 1)

In this unit students develop their understanding of contemporary Ethical issues explored through documentary films. Students:

- develop a critical understanding of the contemporary media and analyse how media texts can privilege certain perspectives and representations of high-profile individuals.
- analyse and evaluate how the human experience is represented in new media texts.
- select an ethical issue to explore through persuasion.

Unit 2: Dystopian Dream (Term 2)

In this unit students develop an appreciation for the power of literature through the study of dystopian fiction. Students:

- discuss and analyse the power of language, aesthetic features and stylistic devices.
- use language creatively to develop agency in creative writing in timed, supervised conditions.

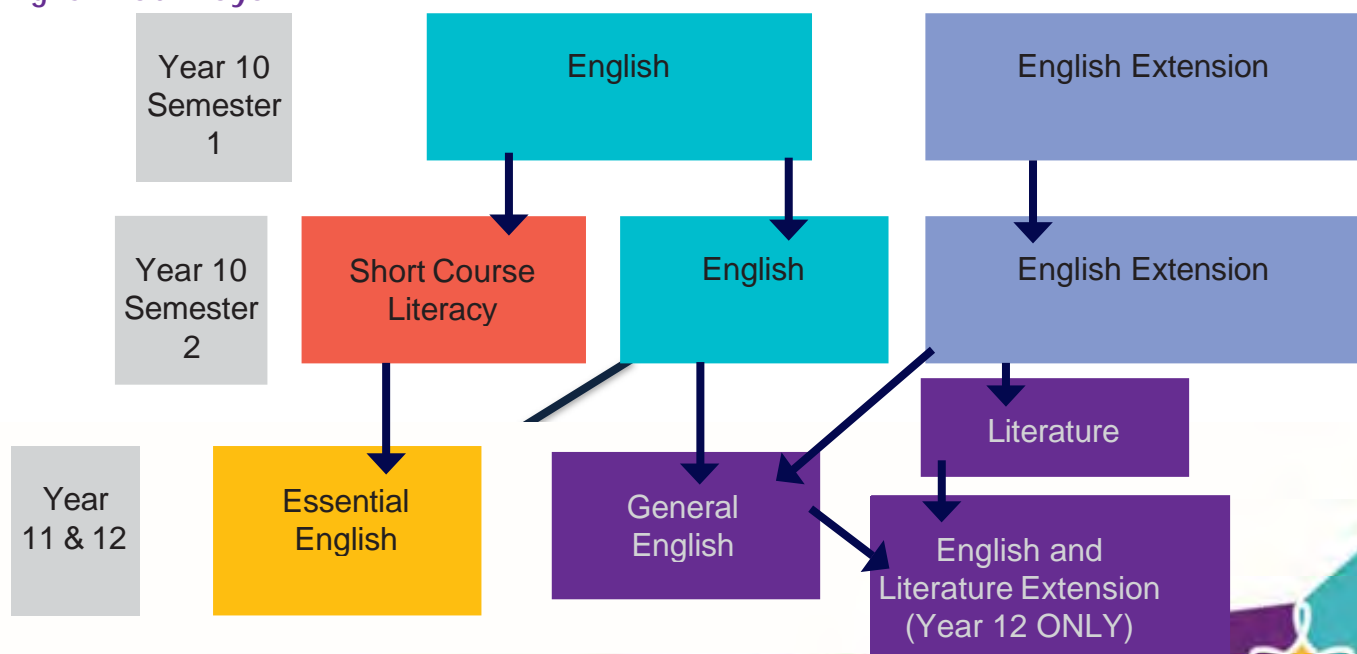

At the completion of Unit 2, students may be invited to participate in the Short Course in Literacy. Those students not invited into the course will remain in ACARA English.

*Year 10 students who study the Short Course in Literacy must select Essential English (Applied) to study in Years 11 and 12.

Unit 3 & 4: Australian Voices and Film (Semester 2) or Short Course in Literacy (Semester 2)

| ACARA English Unit 3 - Australian Voices | ACARA English Unit 4 - Film |
|--|---|
| <p>In this unit students develop their understanding of Australian texts through the close study of an Australian stage play. Students:</p> <ul style="list-style-type: none"> develop an understanding of how Australian voices are developed, privileged or silenced in literature texts create an original imaginative spoken text to explore a character's attitudes, values and beliefs | <p>In this unit students learn to apply their analytical skills in a feature film study. Students:</p> <ul style="list-style-type: none"> analyse how film writers and directors develop cultural assumptions, attitudes, values and beliefs independently plan and write a structured and succinct analytical essay |
| Or | |
| Short Course in Literacy Unit 1 - Personal Identity and Education | Short Course in Literacy Unit 2 - The World of Work |
| <p>In this unit, students develop reading, writing, oral communication and learning skills through expressing personal identity, achieving personal goals, and understanding and interacting with the wider community. Students will also:</p> <ul style="list-style-type: none"> learn to make meaning from different text types identify their own purpose for reading understand the role they play in the construction of meaning identify and develop the set of knowledge, writing skills and strategies needed to shape written language according to purpose, audience and context | <p>This unit helps students develop language skills through activities related to the world of work. They will explore topics around seeking employment, operating in an existing workplace alongside entering a new work environment. They also:</p> <ul style="list-style-type: none"> understand the role they place in the construction of meaning within a workplace environment develop voice and tone in consideration of audience |

English Pathways

Mathematics

Compulsory Core Subject

Mathematics focuses on the development of a deep knowledge and conceptual understanding of mathematical structures and fluency with procedures. Students learn through the approaches for working mathematically, including modelling, investigation, experimentation and problem solving, all underpinned by the different forms of mathematical reasoning.

Year 10 Mathematics (Core)

- **investigate** the accuracy of decimal approximations to irrational real numbers, consider the accuracy of computation with real numbers in context and **explore** the use of logarithmic scales to deal with phenomena involving small and large quantities and change.
- **apply** numerical and graphical and algebraic approaches to **analyse** the behaviour of systems of two linear equations in two variables and solve linear inequalities and represent solution sets as intervals on the real number line.
- **generalise** and **extend** their repertoire of algebraic techniques involving quadratic and simple exponential algebraic expressions, model situations exhibiting growth or decay using linear, quadratic and simple exponential functions, and solve related equations, numerically, graphically and algebraically, with the use of digital tools as applicable.
- **solve** measurement problems involving the surface area and volume of common objects, composite objects, and irregular objects, and use Pythagoras' theorem and trigonometry of right-angled triangles to **solve** spatial problems in two and three dimensions and manipulate images of their representations and images using digital tools. They apply geometric theorems to **deduce** results and solve problems involving plane shapes and use planar graphs and networks to investigate and model relations involving sets of points, connections, paths, and decisions.
- **investigate** conditional probability and its relation to dependent and independent events, including sampling with and without replacement. They **devise** and use simulations to test intuitions involving chance events which may or may not be in dependent.
- **compare** different ways of representing the distribution of continuous data including cumulative frequency graphs and interpret key features of the distribution. They **explore** association between pairs of variables, decide the form of representation, interpret the data with respect to context and discuss possible conclusions. They use scatterplots to informally discuss and consider association between two numerical variables and informally consider lines of good fit by eye, interpolation, extrapolation and limitations.

Mathematics Extension

The extension course covers all the learnings of the Year 10 Mathematics (Core) course to an extended breadth by developing the ability to link mathematical concepts and to enhance problem-solving strategies in a mathematical context at a higher level of complexity.

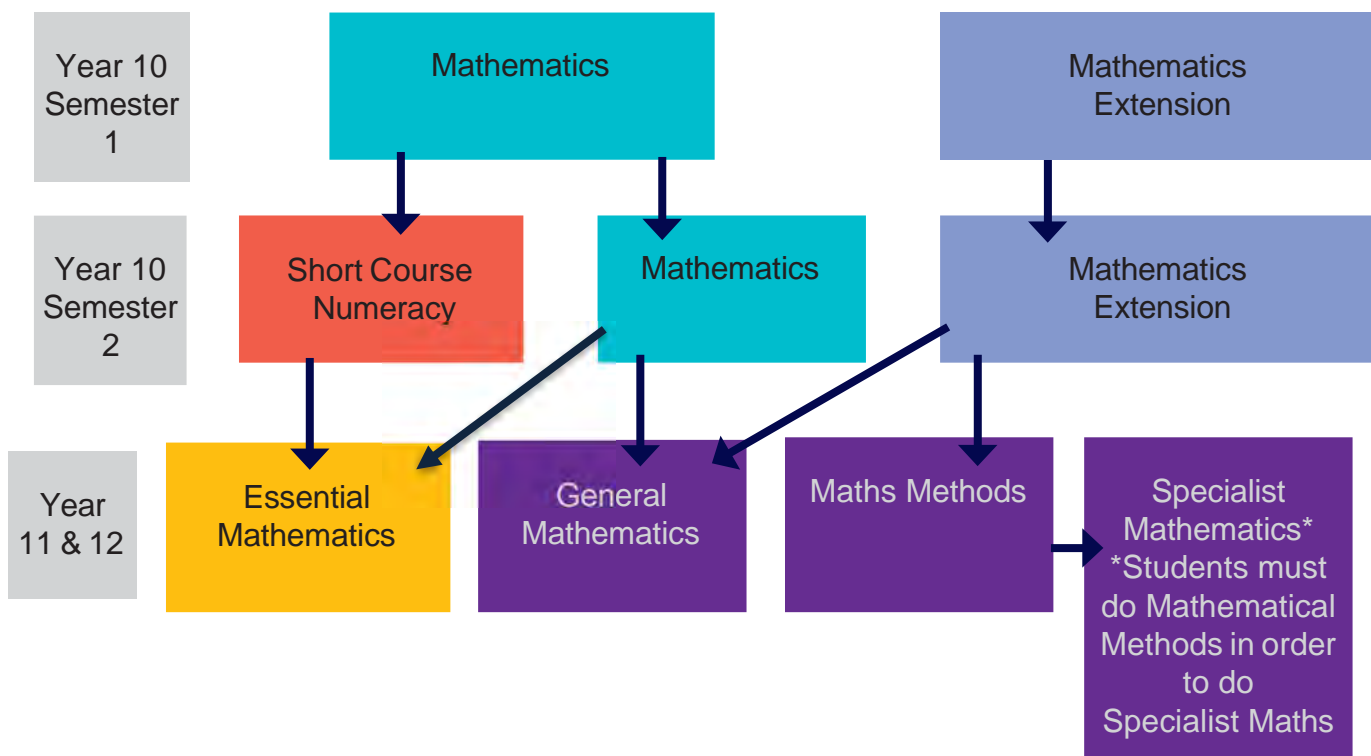

The following additional concepts will be covered in Year 10 Extension Mathematics over the course of the year to prepare students for the courses of Mathematical Methods and Specialist Mathematics in future studies:

- operations on numbers involving surds and fractional exponents.
- the graphs of $y=\sin(x)$ and $y=\cos(x)$ as functions of a real variable and solve related equations
- numerical/tabular, graphical and algebraic representations of quadratic functions and their transformations.
- the inverse relationship between logarithmic and exponential functions.
- relationships between measures of different angles and various lines associated with circles.
- measures of spread and their effectiveness and interpretation with respect to different data distributions.

At the end of Unit 3, students may **be invited to participate** in the Short Course in Numeracy. Those students not invited into the course will remain in ACARA Mathematics.

*Year 10 students who study the Short Course in Numeracy must select Essential Mathematics (Applied) to study in Years 11 and 12.

Mathematics Pathways

Science

Compulsory Core Subject

The science Inquiry Skills and science as a Human Endeavour strands are described across a two-year band. In their planning, schools and teachers refer to the expectations outlined in the achievement standard and also to the content of the Science. Understanding strand for the relevant year level to ensure that these two strands are addressed over the two-year period. These strands of the curriculum are interrelated and their content is taught in an integrated way.

Incorporating the key ideas of science

In the Year 10 curriculum students explore systems at different scales and connect microscopic and macroscopic properties to explain phenomena. Students explore the biological, chemical and physical evidence for different theories, such as the theories of natural selection.

Students develop their understanding of atomic theory to understand relationships within the periodic table. They understand that motion and forces are related by applying physical laws. They learn about the relationships between aspects of the living, physical and chemical world that are applied to systems on a local and global scale and this enables them to predict how changes will affect equilibrium within these systems.

In the Year 10 curriculum students may select to study either General Science or Applied Science.

Students in both courses will explain the processes through which scientific knowledge is validated and examine the relationship between science, technology and engineering. They analyse key factors that influence interactions between science and society.

Students will have the opportunity to:

- plan and conduct ethical investigations to test relationships
- select and use equipment to generate, record and represent repeatable data
- analyse data to identify patterns, trends, relationships and anomalies
- assess the validity of methods, conclusions and claims
- construct logical arguments and evaluate claims
- communicate their ideas, findings and arguments to diverse audiences

Students will explore genetics and evolution by natural selection. Explain how Newton's laws describe and predict the motion of objects in a system. Predict the products of reactions and the effect of changing reactant and reaction conditions.

General Science (3 Units)

- Students engage in a study of: Chemistry, Physics and Biology
- Students will experience greater depth and detail in the content covered during the year. The assessment instruments align to the senior Science curriculum and students will be excellent preparation for students considering an ATAR pathway.

Applied Science (3 Units)

- Students engage in a study of: Chemistry, Physics and Biology
- Students will be expected to apply the scientific knowledge they gain during the course to generate solutions to real world problems.

Humanities

Compulsory Core Subject

The Year 10 curriculum provides a study of both history and geography. The history component focuses on the modern world and Australia from 1918 to the present, with an emphasis on Australia in its global context.

The history content provides opportunities to develop historical understanding through key concepts, including evidence, continuity and change, cause and effect, perspectives, empathy, significance and contestability. These concepts may be investigated within a particular historical context to facilitate an understanding of the past and to provide a focus for historical inquiries. The history content involves two strands: historical knowledge and understanding, and historical skills. These strands are interrelated and have been developed to be taught in an integrated way, and in ways that are appropriate to specific local contexts.

Key Historical inquiry questions

A framework for developing students' historical knowledge, understanding and skills is provided by inquiry questions through the use and interpretation of sources. The key inquiry questions for Year 10 are:

- How did the nature of global conflict change during the twentieth century?
- What were the consequences of World War II? How did these consequences shape the modern world?
- How was Australian society affected by other significant global events and changes in this period?

Whereas, the term unit 'Geographies of Human Wellbeing' focuses on investigating global, national and local differences in human wellbeing between places. This unit examines the different concepts and measures of human wellbeing, and the causes of global differences in these measures between countries.

The content is organised into two strands: geographical knowledge and understanding, and geographical inquiry and skills. These strands are interrelated and have been developed to be taught in an integrated manner, and in ways that are appropriate to specific local contexts.

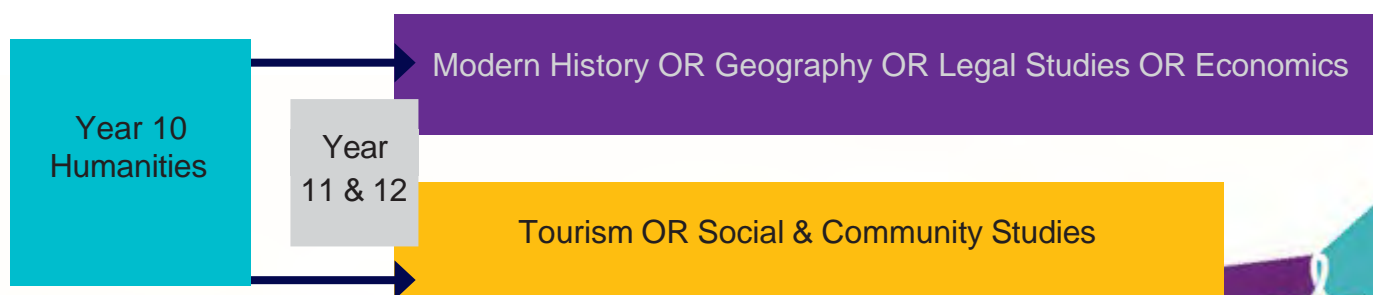

Key Geographical inquiry questions

A framework for developing students' geographical knowledge, understanding and skills is provided through the inclusion of inquiry questions and specific inquiry skills, including the use and interpretation of maps, photographs and other representations of geographical data. The key inquiry questions for Year 10 are:

- How can the spatial variation between places and changes in environments be explained?
- What management options exist for sustaining human and natural systems into the future?
- How do world views influence decisions on how to manage environmental and social change?

Units

- Unit 1: Geographies of Human Wellbeing
- Unit 2: Depth Study: World War II
- Unit 3: Depth Study: Rights and Freedoms
- Unit 4: Depth Study: Popular Culture

Health and Physical Education

Compulsory Core Subject

The Year 9 and 10 curriculum supports students to refine and apply strategies for maintaining a positive outlook and evaluating behavioural expectations in different leisure, social, movement and online situations. Students learn to critically analyse and apply health and physical activity information to devise and implement personalised plans for maintaining healthy and active habits. They also experience different roles that contribute to successful participation in physical activity and propose strategies to support the development of preventive health practices that build and optimise community health and wellbeing.

In Years 9 and 10, students learn to apply more specialised movement skills and complex movement strategies and concepts in different movement environments. They also explore movement concepts and strategies to evaluate and refine their own and others' movement performances.

Students analyse how participation in physical activity and sport influence an individual's identity and explore the role participation plays in shaping cultures. The curriculum also provides opportunities for students to refine and consolidate personal and social skills in demonstrating leadership, teamwork and collaboration in a range of physical activities.

Focus areas to be addressed in Years 9 and 10 include:

- alcohol and other drugs (AD)
- food and nutrition (FN)
- health benefits of physical activity (HBPA)
- mental health and wellbeing (MH)
- relationships and sexuality (RS)
- safety (S)
- challenge and adventure activities (CA)
- games and sports (GS)
- lifelong physical activities (LLPA)
- rhythmic and expressive movement activities (RE)

Unit 1: Motor Learning – Netball Integration

In this unit, students engage with concepts, principles and strategies about Motor Learning. Students recognise and explain that rate limiters are factors that have an effect on performance. Students will analyse primary and secondary data to ascertain relationships between their personal motor learning strategy against movement strategies, concepts and principles, and personal performance.

Unit 2: Functional Anatomy and Biomechanics – Volleyball Integration

In this unit, students will engage in principles of functional anatomy and biomechanics integrated with Volleyball. They will recognise and explain functional anatomy as the study of the function of muscles and bones in movement and biomechanics as the study of the laws of mechanics related to movement. Through their learning, they will have the opportunity to analyse and evaluate the impact of biomechanics on volleyball movement sequences.

Unit 3: First Aid

In this unit, students identify situations where they or others may be at risk and how adolescents respond to these scenarios. They evaluate responses and propose and practise appropriate responses to these situations. Students plan, practise and apply responses to emergencies where first aid (including safe blood practices) and possibly CPR may need to be administered.

Students in Year 10 will complete a Language, Literacy and Numeracy module before the commencement of any Unit of competency, which includes the First Aid clusters.

The LLN module will be completed online as part of the current First Aid cluster, at least to the standard of AQF level 3. The student MUST complete the initial three LLN sections (Language, Literacy and Numeracy) with a pass mark of 80% in each section.

If the student does not reach the 80% pass mark, they will be emailed further information with the relevant Foundation Skills (FSK) unit to assist in further study. As usual, an email will be sent to each coordinator with a summary of each enrolment block of students and which students require further assistance with LLN activities. On completion of the LLN assessment, the student will automatically progress through to the First Aid course materials.

Students will enrol in four units of competency at the College in:

First Aid and Safety Cluster as partial completion of AHC30916 Certificate III in Landscape Construction.

- HLTAID001 Provide cardiopulmonary resuscitation
- HLTAID002 Provide emergency life support
- HLTAID003 Provide first aid
- AHCWHS201 Participate in work health and safety processes

The College has partnered with CSTC Pty Ltd as the Registered Training Organisation, RTO number 0699 for the delivery and assessment of these units. Participants will be required to successfully complete a series of online assessment tasks prior to their Practical Demonstration / Observation scheduled at the College in Term 4, Year 10.

This course intends to provide participants with the skills and knowledge necessary to effectively respond to emergency situations by sustaining/restoring breathing and circulation to an adult, child or infant, and providing First Aid.

On successful completion of the First Aid and Safety Cluster, 2 QCE points will contribute to their core category of learning.

The cost of this competency embedded into this unit is approximately \$80 (dependent on RTO).

Health and Physical Pathways

Accounting

Elective: Accounting, Semester 1 (10BUA1)

This unit focuses on the fundamental accounting process. Success in small business is not just about product design and marketing.

A solid knowledge of accounting processes and an understanding of how it can contribute to the success of an enterprise is crucial in the world of business. The unit is broken up into two strands:

Strand A - Record Keeping Basics

An introductory focus on interpretation and creation of source documents that are prepared and used by business as well as using spreadsheets to calculate figures and simple budgets.

Strand B - Accountancy 101

The second strand of this unit introduces accounting concepts and initial basic bookkeeping processes relevant to small business. Further to this, students explore a unit on the ledger and trial balance as a brief introduction to the Year 11 Accounting course.

By the end of Year 10 students should be able to:

- understand the function and importance of source documentation.
- apply the accounting entity assumption to trading businesses.
- classify accounts into five different categories: revenue (R), expenses (E), assets (A), liabilities (L) and Owner's Equity (Oe).
- understand that there is a twofold nature to every business transaction.
- record transactions in a general journal.
- post transactions to the ledger.
- prepare a trial balance and balance sheet.
- explain the term cloud-based accounting and examine the advantages and disadvantages of cloud-based systems to a small business.
- compare the MYOB software to a manual system and record transactions using the MYOB accounting software.
- understand the Bank Reconciliation process.
- analyse financial data.
- make justified decisions and recommendations.

Accounting Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

Business & Economics

Elective: Business-Economics, Semester 1 & 2 (10BUE1)

By the end of Year 10 students should:

- develop and apply enterprising behaviours and capabilities, and knowledge, understanding and skills or inquiry, to investigate a familiar, new and complex hypothetical national, regional or global economics or business problem.
- analyse the factors that influence major consumer and financial decisions and the short- and long-term consequences of these decisions explain the ways businesses organise themselves to improve productivity, including the ways they manage their workforce and how they respond to changing economic conditions.

Strand A - Running a Small Business

Its aim is to introduce students to the way businesses operate, and the ways businesses respond to opportunities and changing economic conditions. Students are introduced to the basic concepts of underlying small business while discovering the concepts that lead into accounting, economics, and legal studies. This strand examines four main functions of business: Human Resources, Marketing, Operations Management and Finance.

Student Outcomes:

- develop an understanding of and identify different business structures available for commercial operation in Australia.
- investigate a range of small businesses and evaluate their success or failure.
- develop basic bookkeeping and accounting skills.
- examine and gain an appreciation of the legal issues relevant to small business operation in Australia.
- plan and run small business activities with a group of 4-5 students.

Strand B - Economics

This strand's focus is Micro Economics and Globalisation and introduces students to the basic concepts of economics, including how we use our limited resources to best satisfy our unlimited wants and needs, Students also look at individual markets and analysing the market forces of demand (our wants and needs) and supply (providing people with goods and services). From a globalization perspective, students will discuss, consider, and debate positive and negative impacts that trading (buying and selling) with other countries can have on our domestic industries and businesses.

Student Outcomes:

- develop an understanding of economic concepts.
- develop curiosity and problem-solving skills.
- develop transferable skills of critical thinking, intellectual flexibility, visual literacy, digital literacy, literacy skills and learning skills.
- examine and analyse economic problems.

Business & Economic Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSIONS OR CAMPS.

Legal Studies

Elective: Business: Legal Studies, Semester 2 (10BLS2)

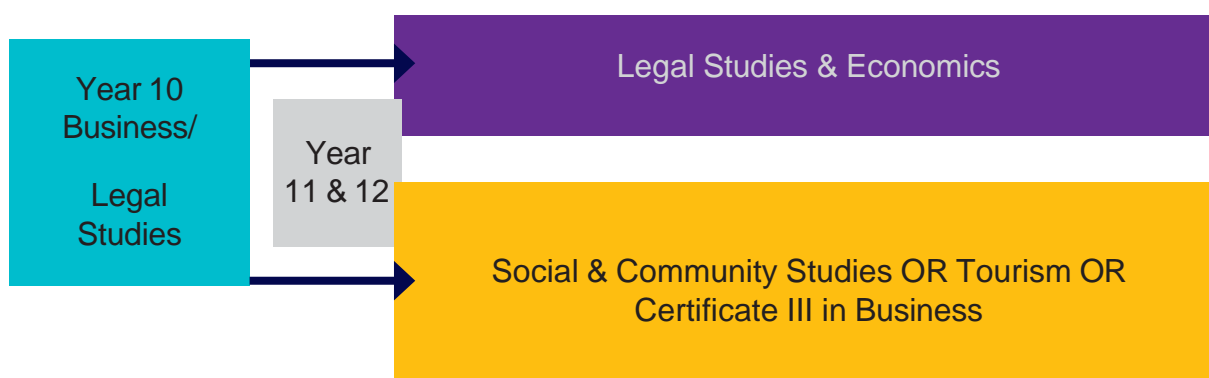

This unit is a combination unit where a term is devoted to Economics and a term is devoted to Legal Studies.

The economic term will examine the way businesses operate at many levels, and the ways they respond to opportunities and changing circumstances and conditions. As businesses operate in the markets, the decisions they make have social, economic, and environmental consequences. This unit will explore the factors that influence the work environment now and into the future and the rights and responsibilities in the work environment.

The Legal Unit will serve as a taster to Year 11-12 Legal Studies. As we know, laws regulate most of the situations we find ourselves in every day. These laws are designed to govern the way in which people behave and act so we can all live in a peaceful and united society. This unit will examine these formal 'legal rules' and how they are enforced by different organisations such as tribunals, parliament, police and prisons through the exploration of various case studies.

By the end of Year 10 student should be able to:

- identify the reasons businesses seek to build and create a competitive advantage.
- investigate the different strategies businesses use to create competitive advantage – lower cost product.
- discuss whether the adoption of strategies based around corporate social responsibility can increase the competitive advantage of business.
- explore emerging techniques businesses can use to gain an advantage, such as blended marketing, open innovation, and social media.
- describe ways in which businesses can improve productivity.
- explore the use of technology and the extent to which it has driven and allowed innovative responses by businesses.
- explore the reasons for triple bottom line business planning.
- investigate ways that businesses have responded to improving economic conditions eg: adjusting marketing strategies to expand their market share.
- collect data and information from a variety of sources relevant to the issue or event being investigated.
- prepare a cost-benefit analysis.
- represent data and information in a format to aid interpretation and analysis.
- apply enterprising behaviours by showing initiative and leadership.
- evaluate the costs and benefits of a range of alternatives such as strategies for a business seeking to remain competitive in the global market.
- discuss the outcomes of a decision, identifying those that were intended and unintended and reflecting on strategies that may address the unintended consequences.
- communicate findings of the investigation in appropriate formats eg. web pages, spreadsheets.

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

Metal Technology

Learning in Design and Technologies builds on concepts, skills and processes developed in earlier years, and teachers will revisit, strengthen and extend these as needed. By the end of Year 10 students will have had the opportunity to design and produce at least four designed solutions focused on one or more of the five technologies contexts content descriptions.

Elective: Metal Technology, Semester 1 (10DTM1)

Unit 3:

- Students are exposed to more complex metalworking techniques.
- Students continue to be instructed on the correct use of hand tools, power tools and equipment that is commonly found in metalworking environments.
- Students will incorporate design aspects as they produce various projects associated with the metalworking industry.

Elective: Metal Technology, Semester 2 (10DTM2)

Unit 4:

- Students continue to 'hone' their skills as they produce projects that will use a variety of metalworking techniques.
- Design will be incorporated into this unit as students design certain elements related to their projects.

Metal Technologies Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

Wood Technology

Learning in Design and Technologies builds on concepts, skills and processes developed in earlier years, and teachers will revisit, strengthen and extend these as needed. By the end of Year 10 students will have had the opportunity to design and produce at least four designed solutions focused on one or more of the five technologies contexts content descriptions.

Elective: Wood Technology, Semester 1 (10DTW1)

Unit 3

- Students exposed to more complex woodworking techniques.
- Students receive instruction on the correct use of hand tools, power tools and equipment that is commonly found in woodworking environments.
- Students will incorporate design aspects as they produce various projects associated with the woodworking industry.

Elective: Wood Technology, Semester 2 (10DTW2)

Unit 4

- Students continue to 'hone' their skills in this area as they produce projects that use a variety of woodworking techniques.
- Design will be incorporated in this unit as students design certain elements related to their projects.

Wood Technologies Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

Design Technology

Learning in Design and Technologies builds on concepts, skills and processes developed in earlier years, and teachers will revisit, strengthen and extend these as needed. By the end of Year 10 students will have had the opportunity to design and produce at least four designed solutions focused on one or more of the five technologies contexts content descriptions.

Elective: Design Technology, Semester 1 (10DES1)

Technologies Design (Unit C)

This Unit will focus on expanding the fundamentals of Design, exploring design styles and influences. Looking at UX (user Experience) and product design, and how it has progressed and influenced our lifestyle.

- Students use design and technologies knowledge and understanding, processes and production skills and design thinking, to produce designed solutions to identified needs or opportunities of relevance to individuals in regional and global communities.
- Students work independently and collaboratively on problem-solving activities that acknowledge the complexities of contemporary life and make connections to related specialised occupations and further study.

Elective: Design Technology, Semester 2 (DES2)

Technologies Design (Unit D)

This Unit will focus on designing for future sustainability and the impact on the environment in our local environment. Students will also explore Engineering concepts and how design has transformed the way we view the world around us.

- Students specifically focus on preferred futures, considering ethics; legal issues; social values; economic, environmental, and social sustainability factors and using strategies such as life cycle thinking.
- Students use creativity, innovation and enterprise skills with increasing confidence, independence, and collaboration. This unit may focus on the application of design thinking to envisage creative products, services, and environments in response to human needs, wants and opportunities.

Design Technologies Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

Digital Technology

Learning in Digital Technologies focuses on further developing understanding and skills in computational thinking such as precisely and accurately describing problems and the use of modular approaches to solutions. It also focuses on engaging students with specialised learning in preparation for vocational training or learning in the senior secondary years. By the end of Year 10, students will have had opportunities to analyse problems and design, implement and evaluate a range of digital solutions, such as database-driven websites and artificial intelligence engines and simulations.

Elective: Digital Technology, Semester 1 (10DIG1)

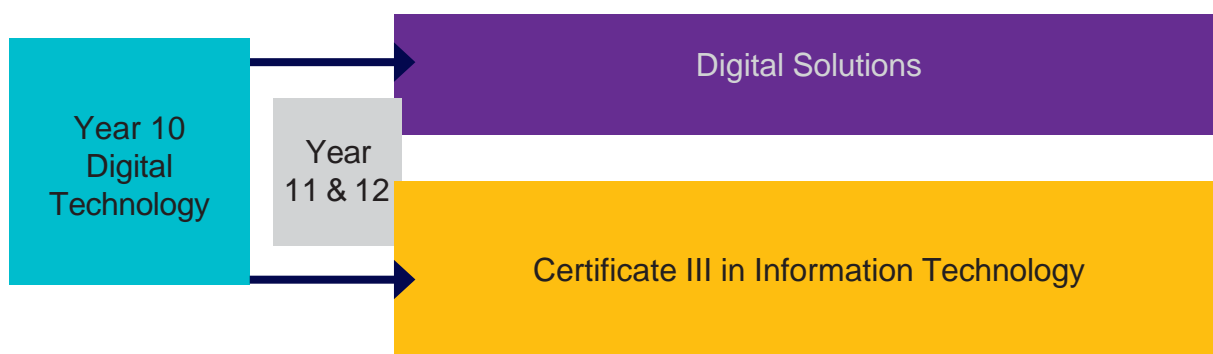

Unit 1

- This unit is designed to develop students coding ability in a variety of different languages. Students will learn the basics of developing code as a way to problem solve. Student will also be introduced to the world of web designing. By the end of the unit they will have developed the skills to take an idea and turn it into a fully working webpage using the EDGE process.

Unit 2

- This unit is specifically designed for those students who enjoy problem solving and using code to help provide the solutions to these problems. By the end of the unit, students will have developed all the necessary skills to create and document a full digital solution. With this unit students will be best prepared for what the senior Digital subjects have to offer.

Digital Technologies Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

Food Technology

Learning in Design and Technologies builds on concepts, skills and processes developed in earlier years, and teachers will revisit, strengthen and extend these as needed. By the end of Year 10 students will have had the opportunity to design and produce at least four designed solutions focused on one or more of the five technologies contexts content descriptions.

Elective: Food Technology, Semester 1 (10DTF1)

Introduction to Hospitality Practices

- The hospitality industry is one of the largest employers in the country and offers many exciting and challenging career opportunities.
- The focus of this unit will be on food and beverage production and service and will require students to work individually and as part of a team to plan and implement a mini hospitality event.
- Students may produce café sandwiches, sweet treats and a variety of hot and cold beverages.

Elective: Food Technology, Semester 2 (10DTF2)

Cooking Around the World

- Students investigate and make judgments on how the principles of food safety, preservation, preparation, presentation and sensory perceptions influence the creation of food solutions for healthy eating.
- Students critically analyse factors (including social, ethical and sustainability considerations) that impact on designed solutions for global preferred futures and apply design thinking as they develop a specialised food product, service or environment for a challenging client. eg. a mountaineer, a homeless person, a person with food intolerances.
- Student critically evaluate the challenging food needs of diverse people.
- Students investigate the principles of food safety, preservation, preparation and the impact of social, cultural and individual preferences on food products generate design ideas for products (food items), services (marketing) and environments (safe, hygienic spaces to produce food)
- Students select and use appropriate technologies skilfully and safely to produce high-quality food products evaluate ideas, processes and solutions against comprehensive criteria for success, including sustainability and client needs
- Students collaborate and work individually throughout the process manage by using digital technologies to develop project plans that include time, cost, risk and production processes

Food Technologies Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

Textiles Technology

Design and Technologies – Textiles, in which student use design thinking and technologies to generate and produce designed solutions for authentic needs and opportunities in the area of textiles.

The practical nature of this Technologies learning area engages students in critical creative thinking including understanding interrelationships in systems when solving complex problems. The learning area's systematic approach to experimentation, problem-solving, prototyping, production and evaluation instil in students the value of planning and reviewing processes to transform ideas into solutions.

Elective: Textiles Technology, Semester 1 (10DTT1 - Trendy Fashion)

Content Descriptors:

- Analyse how people in design and technologies occupations consider ethical, security and sustainability factors to innovate and improve products, services and environments.
- Analyse the impact of innovation, enterprise and emerging technologies on designed solutions for global preferred futures.
- Analyse and make judgements on how characteristics and properties of materials, systems, components, tools and equipment can be combined to create designed solutions.

Trendy Fashion:

- Analyse to empower students to become thoughtful and responsible designers who can analyse, innovate, and create solutions using emerging trends in the field of textiles.
- Through hands-on activities, students will gain practical experience in investigating, designing, producing and evaluation textile products while considering aesthetics, and functionality.

Elective: Textiles Technology, Semester 2 (10DTT2 - Sustainable Fashion)

Content Descriptors:

- Analyse how fibres are produced in managed environments and how these can become sustainable.
- Analyse and make judgement on the ethical, secure and sustainable production and marketing of fibre enterprises.
- Analyse and make judgements on how characteristics and properties of materials, systems, components, tools and equipment can be combined to create designed solutions.

Sustainable Fashion:

- Aims to empower students to become thoughtful and responsible designers who can analyse, innovate, and create sustainable and ethically conscious solutions in the field of textiles.
- Though hands-on activities, students will gain practical experience in investigating, designing, producing and evaluating textile products while considering sustainability and ethics.

Textiles Technologies Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

Japanese

Japanese in Year 10 gives students the opportunity to improve their communication skills and reinforce basic vocabulary and grammar studied during Year 9, with a greater emphasis placed on script writing and recognition. Cultural aspects are identified and built upon throughout both semesters, with manga, anime, origami, cooking and Japanese games also addressed. Students have the opportunity to interact with Japanese students from our sister school, Shijonawate Gakuen, in Term 3 and also participate in a culture-based excursion to Brisbane before the year's end.

It is strongly recommended that students study the 4 units across Years 9 and 10 consecutively, as vocabulary and grammar is built on continually to maximise success.

Semester 2 units provide important grammar in preparation for Senior Japanese, as well as information that relates to the biannual Japanese language and culture tour to Japan. Students develop skills across communicating and understanding the language including reading, writing and speaking in context.

Elective: Japanese, Semester 1 (10JAP1)

Unit 1: Let's Travel to Japan

Topics studied include:

- Schedules and itineraries
- Accommodation and sightseeing
- Transport options and reading timetables
- Fashion (Traditional and Western)
- Health

Elective Japanese, Semester 2 (10JAP2)

Unit 2: A Tourist's World

Topics studied include:

- Tourists
- Tourist attractions
- Cities, towns and amusement parks

Japanese Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

French

French in Year 10 gives students the opportunity to improve their communication skills and reinforce basic vocabulary and grammar studied during Year 9. Cultural aspects are identified and built upon throughout both semesters.

Ideally students continue their study from Year 9, though, as some topics are revisited in more depth, there is the possibility of joining or re-joining the class. Students develop skills in comprehending and composing through Listening, Reading, Speaking and Writing in French. It is strongly recommended that students study the four units across Years 9 and 10 consecutively, as vocabulary and grammar are built on continually to maximise success.

Elective: French, Semester 1 (10FRE1)

Unit 1: Vous payez comment? & Quelle histoire!

Topics studied include:

- Modes of transport
- Purchasing tickets, taking public transport and departure boards
- Announcements in a train station
- Castles
- Fairy tales
- Childhood memories
- Talking about what happened in the past (le passé composé and l'imparfait)
- Cultural topics including composer le billet, Chamonix-Mont-Blanc, La Tartiflette Savoyarde, Trains in France, Le Val de Loire and Le Château de Chambord

Elective: French, Semester 2 (10FRE2)

Unit 2: Vivre écolo & Projets d'avenir

- Environment
- Climate change
- Education and career choices
- Talking about the future (le futur proche and le future simple)
- Cultural topics including famous landmarks and specialties in la Bretagne and la Normandie, discover le Mont Saint-Michel, Claude Monet's house and gardens at Giverny, Le château de Chantilly, and France's World War I connections with Australia and New Zealand

French Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

Music

In Music, students develop practices and skills for listening to, composing, performing and responding to music. They explore a diverse range of styles, traditions and contexts. Students learn to learn to read and write music in traditional and graphic forms and utilise music technology to become independent learners.

Elective: Music, Semester 1 (10MUS1)

Unit 1: Greatest Hits

Presenting and Performing

- Play classical pieces on Keyboard or Guitar
 - Play or sing your favourite songs on your preferred instrument in small groups or solo
- Creating and Making
- Arrange music for small instrumental groups
 - Compose an original piece of music for instruments
- Exploring and Responding
- Explore to famous Classical pieces
 - Explore to jazz and rock songs that have become classic hits
 - Learn about musical styles and elements

Elective: Music, Semester 2 (10MUS2)

Unit 2: Music of the Media

Presenting and Performing

- Play film music pieces on Keyboard or Guitar
 - Play or sing your favourite songs on your preferred instrument in small groups or solo
- Creating and Making
- Create music for a film or video game using digital audio software
 - Compose a jingle to advertise something
- Exploring and Responding
- Explore the way composers use music in films
 - Explore theme tunes in television and audio games
 - Investigate the role of music in advertising
 - Learn about musical styles and elements

Music Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

Drama

Drama is a subject in which through play and imagination you learn expression and practice vital communication skills. Drama is one of the only subjects where collaboration through group work is necessary – a critical skill of working within teams. Drama enhances students' artistic and creative abilities and gives students a better understanding of themselves and their world contexts such as; identity, societies, cultures, ideologies, gender, time, and change, and therefore students are able to critically reflect. The study of drama covers a diverse range of practical and theoretical components. These involve:

- Vocal skills
- Movement and basic stage techniques
- Reading play texts and writing scripts
- Forms, styles and genres of dramatic action
- Acting spaces and dramatic conventions

Students will have the opportunity to view performances through incursions/excursions. Drama students are encouraged to audition for musicals and perform at events such as Skits & Semiquavers.

Elective: Drama, Semester 1 (10DRA1)

Unit 1:

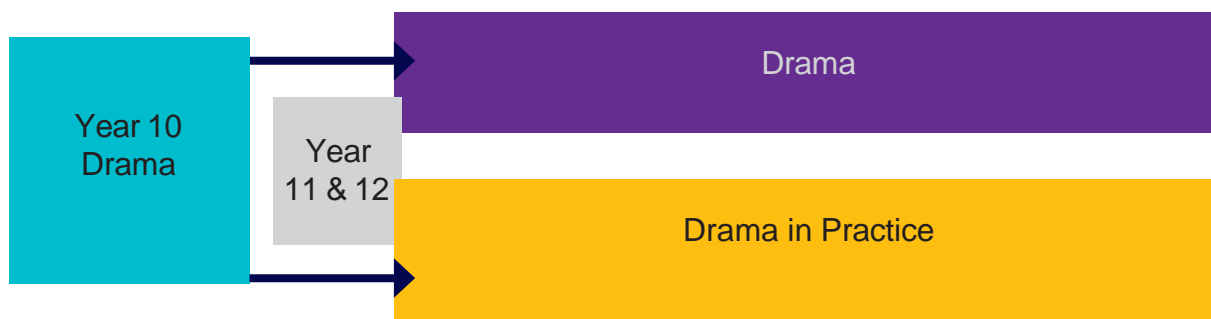

Students manipulate combinations of the elements of drama to develop and convey the physical and psychological aspects of roles and characters consistent with intentions in dramatic forms and performance styles.

Elective: Drama, Semester 2 (10DRA2)

Unit 2:

Students devise and refine scenarios and scripts, both individually and as part of an ensemble. They will practice and refine the expressive capacity of voice and movement to communicate ideas and dramatic action in a range of forms, styles and performance spaces, including exploration of those developed by Aboriginal and Torres Strait Islander dramatists.

Drama Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

Visual Art

Year 10 semester Visual Art electives are about focusing on developing conceptual ideas in their artworks. Students extend on the skills acquired in Year 9 and continue to explore various techniques and media with the ability for greater individualised ideas to further develop a personal aesthetic. Students will experience a range of art forms within the categories of 2D, 3D and 4D (time-based media) ranging from realism to abstraction. Adding to this they will gain a deeper understanding about art history movements, contemporary artists and art practices. Students respond to artworks through informal discussions as well as by writing artist statements about their own outcomes and critiquing Artists' artworks.

Students may have the opportunity to experience an enrichment excursion experience to the local art gallery or industry institution.

Elective: Visual Art, Semester 1 (10VAR1)

Students may experience the following art forms:

- 2D Drawing eg. Abstract Expressionism
- 2D Painting eg. Surrealism

Elective: Visual Art, Semester 2 (10VAR2)

Students may experience the following art forms:

- 2D Printmaking eg. Social Commentary
- 3D Ceramics eg. Hybrid/Anthropomorphic Statuettes
- 4D Digital Art eg. Video Art

Visual Art Pathways

THIS ELECTIVE SUBJECT WILL INCUR A LEVY WHICH MAY INCLUDE CONSUMABLES, EXCURSION OR CAMPS.

St Joseph's College

Schedule of Levies 2023

The table below indicates the costs of levies for 2023. This table should be use as a guide only. At the end of 2023, each family will be given a schedule of fees for subjects levies once final costings have been determined for 2024.

| Subject Type | | | | | | |
|---|--------|--------|--------|---------|---------|---------|
| | Year 7 | Year 8 | Year 9 | Year 10 | Year 11 | Year 12 |
| Drama In Practice | | | | | \$ 100 | \$ 100 |
| Drama | | | \$ 35 | \$ 35 | \$ 100 | \$ 100 |
| Design Technology - Food | | | \$ 90 | \$ 100 | | |
| Design Technology - Metal | | | \$ 60 | \$ 60 | | |
| Fashion | | | | | \$ 50 | \$ 50 |
| Design Technology - Textile | | | \$ 50 | \$ 80 | | |
| Design Technology - Wood | | | \$ 70 | \$ 80 | | |
| Furnishing Skills | | | | | \$ 200 | \$ 300 |
| Design | | | \$ 25 | \$ 25 | \$ 25 | \$ 25 |
| French | | | \$ 75 | \$ 75 | \$ 78 | \$ 78 |
| Japanese | | | \$ 115 | \$ 115 | \$ 115 | \$ 115 |
| Music | | | \$ 25 | \$ 155 | \$ 155 | \$ 155 |
| Music Extension | | | | | | \$ 155 |
| Visual Art | | | \$ 25 | \$ 25 | \$ 135 | \$ 105 |
| Legal Studies | | | | | \$ 15 | |
| Visual Arts in Practice | | | | | \$ 95 | \$ 95 |
| Social & Community Studies | | | | | \$ 150 | |
| Tourism | | | | | \$ 30 | \$ 30 |
| Biology | | | | | \$ 515 | \$ 515 |
| Certificate I in Construction + Certificate II in Construction Pathways | | | | | Nil | |
| Certificate II & III in Sport and Recreation | | | | | \$ 390 | |
| Certificate II in Engineering Pathways | | | | | Nil | |
| Certificate II in Hospitality | | | | | \$ 465 | |
| Certificate III in Business Yr 11 / 11C3B | | | | | \$ 300 | |
| Certificate III in Information Technology | | | | | \$ 550 | |
| Health & Physical Education | | | | \$ 80 | \$ 50 | \$ 50 |
| Camp or retreat or work experience | \$ 300 | \$ - | \$ 460 | \$ 20 | \$ 400 | \$ 355 |
